Cam-Motion® DC630G Vertical Gate Closer

Experience a safer  
and more open world

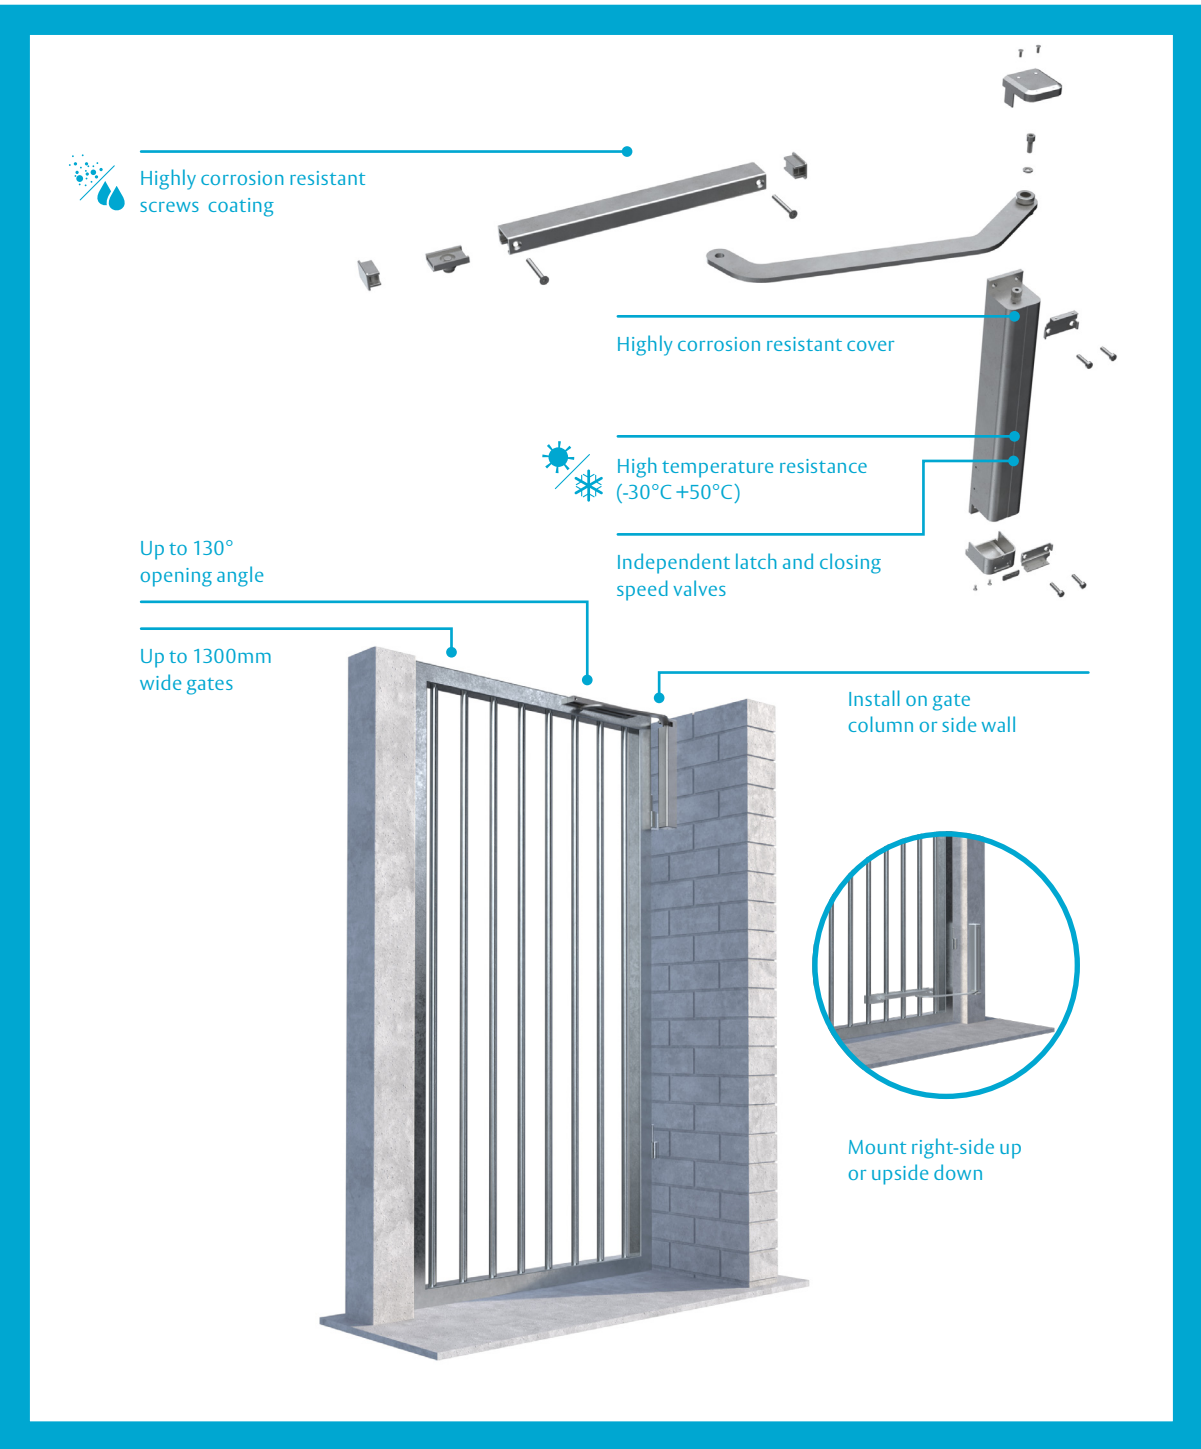

# High performance technology for exterior gates

ASSA ABLOY DC630G Vertical Gate Closers protect your property beyond the entrance door

A single model can equip almost any pedestrian or security gate at your premises, making life easier for distributors, stockists, installers, architects and specifiers

Security doesn't begin at your front door. A perimeter gate is your first line of defence, but human error can still leave premises vulnerable. At home, this could risk the safety of children or allow a beloved pet to escape. At commercial sites, an open gate is an invitation to intruders and threatens valuable employee property like cycles.

Yet at the same time, a gate should not be inconvenient. It shouldn't erect a barrier to the young, old or less-able. ASSA ABLOY Vertical Gate Closers are equipped with unique 3D Cam-Motion® technology. They open easily with minimal user force and shut tight. You can relax: Your property is secure and welcoming.

A minimalist and slim design, mounted vertically behind your gate - out of sight but always at work. Compatible with almost any pedestrian and security gate with a range of mounting plates.

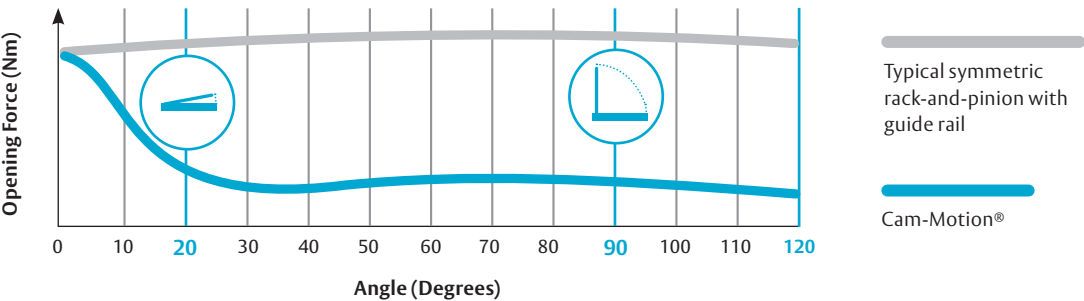

# Feel the difference with Cam-Motion® technology

Every user, young or old, opens your gate effortlessly and safely

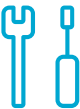

Compared to rack-and-pinion closers with guide rails, you need not pull or push a Cam-Motion® closer so hard (see the graph, below). It is easier on your arms — and built for the natural power of the human elbow. Especially for younger children, elderly and the less-able, opening a door is easy and comfortable.

A gate closer equipped with 3D Cam-Motion® technology is unlike anything you have used before. Cam-Motion® is a performance door opening and closing technology usually found on high-end interior and entrance doors. An ASSA ABLOY Gate Closer adds this premium technology to almost any pedestrian or security gate.

An ASSA ABLOY Vertical Gate Closer requires less effort, ensuring comfortable operation and barrier-free access for all. It shuts tight without force. Unlike traditional door- and gate-closing technology, Cam-Motion® does the heavy lifting, so your employees, guests and family members don't have to.

# How ASSA ABLOY vertical gate closers make the difference

## "Fit-and-forget" performance

- Independent latch and closing speeds, thermo-resistant valves ensure speeds stay set
- High corrosion and temperature resistance saves maintenance costs

## Minimal aesthetic impact

- Fits either side of any gate, concealed behind the frame when installed
- Slim build minimizes visual impact; mounting plates ensure broad compatibility

## Barrier-free security

- Ergonomic opening and closing performance keeps users and your property safe
- Arm design allows for greater space which minimizes any risk of finger trapping

## One model to save time

- One flexible product saves wholesalers' stockroom space and simplifies specification
- Consistency across the whole ASSA ABLOY closer range ensures design harmony

The ASSA ABLOY Group is the global leader in access solutions. Every day, we help billions of people experience a more open world.

ASSA ABLOY Opening Solutions leads the development within door openings and products for access solutions in homes, businesses and institutions. Our offering includes doors, door and window hardware, locks, access control and service.
